**InBank Privati** is a simple and secure system which helps your customers to save precious time, allowing them to manage their current accounts via an ordinary internet access point from home or the office anywhere in the world.

**InBank Business** allows your bank's corporate clients to manage their bank business more quickly, easily and securely 365 days a year from anywhere in the world: all that's needed is an Internet access point and any company can consult and manage its accounts directly.

**Better informed customers**

With just a few clicks your customers can have real-time access to:

- Share portfolio status
- Direct debits information
- Transactions and balance information

- Business payments portfolio status
- Portfolio results
- Transactions and balance information

The **InfoB@nking** service also allows you to send all of your InBank customers their bank correspondence in electronic format (for example, account statements, rates tables, transparency-related documents, reminders of accounting deadlines, etc.). Phoenix has already issued 2,000,000 such documents in electronic format.

**Simpler banking operations**

Without visiting their branch your customers can:

- Top up pre-paid cards, or cellphone and digital terrestrial accounts
- Pay road tax and TV licences
- Make payments through postal payment slips
- Make tax returns using F24 forms
- Make domestic and foreign bank transfers

- Transact salary payments
- Effect RIBA electronic bank receipt, direct debit and giro transactions
- Make tax returns using F24 form
- Make domestic and foreign bank transfers
- Advanced management of multiple pay slips and online payment receipts

**On-line trading**

InBank Privati provides customers who are investors with a simple, easy-to-use trading module which is completely integrated into your banking information system:

Trades on: Borsa Italia- the Italian stock exchange – daytime and after hours, Euronext (Paris, Amsterdam, Brussels), Frankfurt (equities) and IBEX (major stocks traded on Spanish market)

Main functions: monitor orders, records orders, share portfolio updated online with market prices, graphic analysis of portfolio makeup, Info Provider: Telekurs

**CBI service**

We guarantee complete integration for your corporate clients with the world of Customer to Business Interaction (CBI) for multi-user and multi-bank management

**Customers constantly connected**

Thanks to the mobile InBank platform, your customers can perform InBank's principal banking operations not only from a PC, but also directly from a mobile phone with Internet access.

**Security first**

"Active" security through the use of OTP Tokens to ensure highest levels of security. The Token, which is as small as a key, generates a dynamic password to ensure authenticity of instructions

"Passive" security using various support alarm modes (SMS, e-mail) allowing warnings to be issued with every access and/or instruction
