## SIB2000

### Il sistema per fare banca

**SIB2000:** our banking information system containing over 200 modules. The system provides you with 360° operational control over your bank

**SID2000:** is the management information service which allows you constant monitoring of levels of credit risk and control of margins

**SIM2000:** is the marketing information service which provides support for your policy decisions and business relations

### Ensuring immediate operational advantages

#### INTEGRATION OF FUNCTIONS AND ACCOUNTING

Single accounting engine records banking events in real time

Multi-divided and native IAS accounting formats

Single reporting database ensures completeness of each data item

Uniform and coherent methods used to display banking information

Simple to use, easy to navigate, with immediate access to banking information

#### INTEGRATED WITH OTHER PHOENIX SERVICES

Documents archive, virtual bank, money services

### Flexible, covers your bank's every need

Build operational processes tailored to the organisation of your institution

Personalise printed forms for your customers

Define confidentiality policy for the bank's information resources and access policies to single functions

### Neutral, to give you free choice of counterpart

Independence from banking counterpart (interbank network) with option of managing mixed solutions

Integration with a number of financial and insurance product providers

Integration with databases (CRIF, CERVED, official records, financial info providers, services)

Connection with electronic markets (with integrated on-line trading)

### Easy to use, in order to allow simple and easy use of the information system for you and your associates

Outsourcing service for operational management of system (ISO 9001:2008)

- updates for new SIB2000 releases
- management of scheduled processing tasks
- technical interface with printing service

Centralisation of client component (PHS service)  
Centralisation of data transmission network (RTD service)
